

Press release

Paris, July 3rd 2023 – **The sixth edition of the Séphora Berrebi Scholarships for Women in Advanced Sciences is dedicated to mathematics. The call for applications runs until September 3rd 2023.**

The Séphora Berrebi foundation has set up a scholarship for young female researchers in Mathematics and Computer Science in 2017. The aim is to encourage the active participation of women in scientific research, particularly in these fields where they are under-represented.

For this sixth edition, a 2000€ scholarship will be again awarded to 2 young female researchers in **mathematics**, whatever their nationality, provided they are enrolled in a doctoral school or a research laboratory in France or in Israel.

We are pleased to announce that the Jury in Mathematics will be chaired by **Prof. Laure Saint-Raymond**.

The submission deadline is **September 3rd 2023** midnight.

The Awards Ceremony in France is planned on mid December and the Awards Ceremony in Israel will be held on October, 12th 2023.

About the Séphora Berrebi foundation

Created in 2017 as a tribute to Séphora Esther Haya Berrebi, the Séphora Berrebi French NGO acts day after day, week after week, to allow everyone to learn, according to their needs.

Within the framework of its Education & Solidarity pole, it works to **fight against school dropout**, to **reduce the digital divide** through the SkooLab activities (high tech camps, coding hours, tutoring) and to **promote women in sciences**.

With the Mieux vivre Moi aussi pole, the association supports children, adolescents and young adults suffering from a chronic or **serious illness**, or from a **handicap**, in particular a cognitive handicap.
